Length:	According to the product type mm +/- 0,2% of length
Width:	According to the product type mm +/- 0,3% of Width
Wear layer:	Solid wood veneer, 4 mm +/- 0,2 mm
Profile:	Tongue and groove all four sides, microbevel 4 sides
Bevel:	4 sides, 1 mm
Moisture content:	7 % +/- 1 %
Angle:	From 45 to 90 degrees +/- 0,1 degree

Construction

Engineered. 3-layered. 18 or 21 / 5 mm

Dimensions

Custom dimensions are available upon request.
Please contact us on info@chevronparquet.com for more information.

	Width	Length
Oak	300 mm	2400 - 3000 mm
	330 mm	2400 - 3000 mm
	360 mm	2400 - 3000 mm
	390 mm	2400 - 3000 mm

Random lengths

In order to preserve and utilize the core timber to the full, the plank is delivered in random lengths where we always strive to deliver as long planks as possible. This contributes to a harmonious and natural look on your floor.

Planks. Engineered 18 or 21/5 mm

Technical information

Characteristics

Images are only indicative

Premium.

Homogenous, calm and subtle expression and color with less knots.

Nature.

Natural and dynamic expression and color with more knots and color variation.

Classic.

Authentic and lively expression with more color variation and larger knots.

Surface

All of these treatments can be combined.

Brushing

When boards are brushed, the soft wood is absorbed between the harder wood veins with the aid of a steel brush. A subtle structure is created which allows you to feel the wood grains. The result is a floor with a clear grain pattern.

You can opt for a rougher or finer finishing according to the type of brush you use. slightly darker in direct sunlight.

Hand scraping

Scraping the parquet goes back to an old technique where the top layer of the floor is scraped off, with the objective of making the boards smooth and flat. With this treatment, imperfections are purposely added to hide wear and tear. This results in a floor with a little more relief, which contributes to the aged look.

Saw marks

When the panels are cut at the sawmill, the saw blade leaves marks. These can be preserved on the floor surface in order to add more character and authenticity to the floor

Uneven surface

"Uneven surface" gives the floor the same character as if it was 150-200 years old. The surface is slightly irregular and brushed with visible saw marks.
